

CRE Analyzer Agent

Team: AI-Illuminati

Clean Agent Architecture

A layered architecture separating deal input, financial analytics, AI reasoning, and cloud execution to ensure explainability and control.

Layer	Purpose
Input Layer	Deal capture and scenarios
Agent & Analytics	Valuation, DSCR, reasoning
Platform Layer	Cloud Run, scaling, observability

Future State – Multi-Agent Architecture

Specialized agents collaborate through an orchestrator to deliver a consensus underwriting view, enhancing depth, accuracy, and governance.
